007:

This is MI6. Hope you got out of Buenos Aires alive.

We've gotten wind of a new evil plan to conquer the world, and we know that the plan is being financed by a casino out in Budapest. We need someone to infiltrate it and beat the casino owners at their own game.

Unfortunately, due to budget cuts, we've replaced all our secret agents with reinforcement learning agents. We need you to program a RL agent that can maximize its earnings at these casino games. Good luck.

- M
